
NATIONAL MASTER COURSE
EVALUATION ALGEBRAIC GEOMETRY, spring 2004

What is your opinion on the contents of the course? (E.g. level adequate, better than anticipated, too elementary, etc.)

Did you have the required prerequisites?

What is your opinion on the teaching quality of the instructor?

What is your opinion on the book?

What do you think about the examination system that we used (i.e., an oral exam about the exercises of the problem session)?

Did you get help from someone from your own university, e.g. with the exercises? If not, do you consider this a problem?

What is your opinion on the problem session and the teaching quality of its instructors?

How do the 8 EC points compare to the actual workload?

Other comments?
